The composition, structure, and function of estuarine salt marshes, coral reefs, and the sediment plains of the deep sea are very different Figure For example, salt marshes in many regions have high primary production-production of organic carbon-containing compounds from carbon dioxide through photosynthesis-based on high availability of nutrient elements such as nitrogen. It is a sad thing to be always grieving, moaning, and complaining concerning the present. Sed diam. NWSuiteWashington,D. We believe that regulations on the interpretation of the terms "interests of justice" are needed in order to have objective standards regarding Article 53 that could be applied in every situation.
